

GARAGE CABINETS

A Carolina Custom Garages storage system can transform an untidy garage into an organized, efficient and enjoyable space. Durable, heavy-duty materials and easy-to-clean surfaces stand up to a tough garage environment.

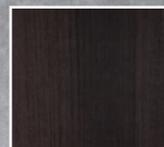

Hanging cabinets protect gear from damp concrete and allow for easy cleaning underneath. A variety of handle options allow you to customize your garage to fit your style. Our cabinets are constructed to withstand extreme weather cycles.

Our garage storage systems offer quality features like steel hardware, one-inch thick adjustable shelves with 2MM edgebanding, full back panels, laminate or maple butcher block tops, and dovetail construction on full-extending drawers.
